Create a tour with specific data

Andreas Müller has too many cows and he wants to sell four of them to a friend who is also a farmer. He wants to hire anitrans to transport them. His farm is located at *Klefelen 410, 3537 Eggiwil, Bern*. His friend's name is *Peter Odermatt* and his farm is located at *Vorderbrunnen 25, 6162 Entlebuch, Luzern*. The start of the tour should be scheduled this thursday, *16.11.2017 at 09:30*. Odermatt confirmed that he could receive the delivery *between 10:00 and 12:00*. You think that the tour is going to take *about one hour*. Your driver *Eric* should be well suited for this tour.
For four cows, a *medium sized truck* should do the job.

Edit specific fields of the previously created tour

Peter Odermatt calls you because he realized that he has an appointment at the time delivery time-frame he has originally given you, therefore he'd like to get the delivery (of the by now *five* cows, since one of the cows of Andreas Müller has given birth to a new calf) two hours later than previously arranged. Furthermore *Peter Odermatt* tells you, that Andreas Müller has married his girlfriend and now has the surname *Müller-Münger*.
Also consider *picking a bigger truck*, since the cargo has gotten a bit bigger.

Remove a certain driver from the system

Eric, the last tour's driver, sadly crashed his truck. Therefore he is not deemed fit to continue on his job and has to be fired.

Driver View

Register as a new user with given user data

Hansueli Müller, a new driver, got his driving license a week ago and now want's to drive some animals. He's very shy and doesn't want to phone the owner of Anitrans to ask him for a new job, but he decided to create an account and submit his credentials, so the owner can contact him if he want's.

Mark a specified tour as unsuccessful

The new driver, Hansueli, has completed his first tour. However, instead of five chicken with wings, he delivered five chicken wings. Obviously the recipient isn't happy with this delivery and Hansueli needs to mark the tour as unsuccessful. He also needs to write a comment explaining his mistake.

Find a tour with certain criteria within the weekly tour overview

After only a week, Hansueli has completely lost track of his assigned tours already. He remembers seeing a tour with *15 sheep* as cargo, that needs to go to *Lugano*. Help him locate this particular tour in his weekly overview.
